

MISS MUSTARD SEED'S[®] MilkWax[™]

INGREDIENTS

Beeswax, Carnuba Wax, Isoparaffinic Hydrocarbon (Odorless Mineral Spirits)

The color variations contain various natural pigments including: Iron Oxides and/or Titanium Dioxide

HOW TO STORE IT

Store container upright at room temperature with lid secured. Keep away from high heat as that may cause the wax to melt and/or separate. Keep away from open flame, it is FLAMMABLE.

HOW TO USE IT

Use a clean cotton cloth or wax brush to apply wax in a thin layer, working into recesses of carved details or surface imperfections. Wipe away excess. Allow it to dry for 3-5 minutes. Buff to a shine with a clean lint-free cotton cloth or buffing brush. This product may be applied directly over dry milk paint, directly on raw wood, or over any of our other wax finishes. Clean brush with soap and warm water or Mineral Spirits.

KEY FEATURES

- Easy to apply with a lint-free cloth or brush.
- Can achieve a variety of finishes from matte to semi-gloss depending on how many coats are applied and the method of buffing.
- A "livable" finish, meaning that scratches and blemishes can be sanded out and wax can be reapplied, making it a great finish for busy households.

ADDITIONAL TIPS

- Colored waxes can be applied over Clear for workability and a more subtle look.
- Wax will melt in high temperatures, even after furniture application and curing. Not for outdoor use or in areas of direct sunlight.
- Use multiple thin layers for best outcome.
- Cure time of 30 days.
- Should not be applied to a surfaces that comes into contact with food. Not food safe.
- Wax is intended to be the final coat of a project.
